WOUND KLENSE™

*SPRAY SOLUTION TO AID SKIN AND WOUND CLEANSING FOR CATTLE, HORSES,
DOGS & CATS.*

PRESENTATION: Colourless liquid.

ACTIVE CONSTITUENTS: Each L contains:

PROPIONIC ACID	35 g
MALIC ACID	15 g
PROPYLENE GLYCOL	78.5 g

PROPERTIES:

Wounds heal more quickly with less scarring if they are kept clean and protected during the initial healing period. The organic acids in **FARNAM® WOUND KLENSE™** assist in the removal of necrotic tissue (dead or dying skin cells), serum discharges, pus and other debris from wounds. The acidic environment provided by these acids also helps to limit bacterial and fungal growth on the wound surface. Removal of damaged tissue and maintaining a suitable environment by regular application to limit infection promotes rapid healing and the regeneration of healthy tissue. Maintaining a clean, low moisture, healthy wound environment also limits the development of 'proud flesh'. **WOUND KLENSE™** is non-greasy and aids in preventing tissue from drying out. It provides a source of energy for regeneration of the skin surface and helps maintain a protective action against infection and repels excess moisture, thereby limiting the build-up of 'proud flesh'.

WOUND KLENSE™ is a gentle, highly effective wound cleansing preparation that can be applied to clean debris and residues from healing wounds.

It is best applied prior to the application of other wound disinfectants and healing preparations such as **FARNAM® BUFFERED IODINE™** and **FLINT'S MEDICATED OIL™**.

DIRECTIONS FOR USE:

Avoid contact with the eyes and mucous membranes. For external use only.

Spray the surface of the open wound to remove embedded dirt, grit and dried debris from the affected area. The residue of solution left on the wound aids removal of dead tissue and promotes healing. Wounds may be bandaged with a dressing soaked in **WOUND KLENSE** and changed daily. Repeat as necessary.

WITHHOLDING PERIODS: (CATTLE: MILK & MEAT): NIL (HORSES: MEAT): NIL

TRADE ADVICE: EXPORT SLAUGHTER INTERVAL (ESI): ESI not required.

POISONS SCHEDULE: NOT APPLICABLE

REGULATORY STATUS: Australia: Australian Pesticides & Veterinary Medicines Authority

PACK SIZES: 500 mL spray pack
